PROPOSAL · CONFIDENTIAL

# AI Search Visibility Assessment & Engagement Proposal for Drillbit Plagiarism

Prepared for: **Drillbit Plagiarism** · Prepared by: **SoftwareSuggest AEO/GEO Team**

EXECUTIVE SUMMARY

## Your product is already part of how AI answers buyer questions

Independent tracking of softwaresuggest.com's listing pages shows that **Drillbit Plagiarism** (softwaresuggest.com/drillbit-plagiarism) has been cited **8 times** across AI Overviews, ChatGPT, Gemini, Perplexity and Copilot to date. This places Drillbit Plagiarism among the products already surfacing inside AI-generated answers — the layer an increasing share of B2B buyers now consult before they ever reach a traditional search results page or vendor comparison site.

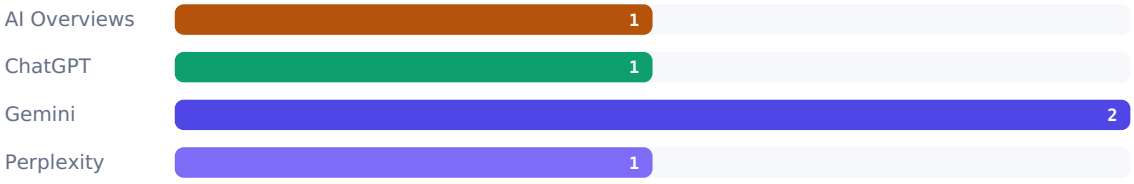

This proposal outlines the current state of that visibility, the mechanics behind it, and a recommended engagement to protect and expand Drillbit Plagiarism's presence as AI search continues to grow as a buyer-research channel.

1. CURRENT AI VISIBILITY ASSESSMENT

## Where Drillbit Plagiarism stands today

The figures below reflect citation activity captured for softwaresuggest.com/drillbit-plagiarism across major AI answer engines.

| 8 | 1 | 1 | 2 |
|---|---|---|---|
| Total AI citations | Google AI Overviews | ChatGPT | Gemini |

*Source: Ahrefs Brand Radar citation tracking for softwaresuggest.com. Figures reflect point-in-time data collected September 23, 2026 and are subject to change as AI platforms refresh their indexes.*

2. REPRESENTATIVE QUERY PATTERNS

## The kind of buyer questions this visibility touches

The examples below illustrate common buyer-research query patterns for this category. They are representative constructions, not verified individual prompts, and are included to contextualize how citation activity translates into real buyer touchpoints.

*“Drillbit Plagiarism vs competitors comparison”*

A buyer asking Google AI Overview this today would likely see a structured, cited answer — and with **Drillbit Plagiarism** already appearing **8 times** across tracked AI platforms, staying visible in exactly this kind of query is what the plan below protects and grows.

*“top software like Drillbit Plagiarism in 2026”*

A buyer asking ChatGPT this today would likely see a structured, cited answer — and with **Drillbit Plagiarism** already appearing **8 times** across tracked AI platforms, staying visible in exactly this kind of query is what the plan below protects and grows.

*“Drillbit Plagiarism pricing and reviews”*

A buyer asking Gemini this today would likely see a structured, cited answer — and with **Drillbit Plagiarism** already appearing **8 times** across tracked AI platforms, staying visible in exactly this kind of query is what the plan below protects and grows.

3. PROPOSED ENGAGEMENT METHODOLOGY

## How we protect and grow this visibility

Our approach is structured around four phases, applied specifically to Drillbit Plagiarism's category and buyer-intent data:

01

### Diagnose

Establish a full baseline of how Drillbit Plagiarism shows up — or doesn't — across today's AI platforms, and identify where competitors are winning citations instead.

02

### Create

Produce structured, source-worthy content aligned to the specific queries AI systems retrieve most for this category.

03

### Reinforce

Strengthen the entity clarity and trust signals AI models weigh when deciding whether a brand is safe to recommend.

04

### Track

Report monthly, in plain language, on exactly where Drillbit Plagiarism is named, paraphrased, or omitted across tracked platforms.

4. RECOMMENDED ENGAGEMENT & INVESTMENT

## Recommended plan for Drillbit Plagiarism

You're already showing up in AI answers — this tier is built to turn that early signal into consistent, category-wide citation share.

SCALE

**$5,000** /month · 3-month minimum

- 2-3 AI content assets / month
- 8 AI-optimized articles
- AI Visibility Tracking
- Prompt Performance Monitoring
- Comparison Content Strategy
- AI Brand Mention Tracking
- Full-time Account Manager

5. TERMS & NEXT STEPS

## How to proceed

- This proposal is valid for 30 days from the date above (September 23, 2026 – October 23, 2026). Citation figures and recommended tier may be revised on renewal, reflecting updated tracking data.
- Engagement begins with a scoping call to confirm objectives, category keywords, and reporting cadence.
- Billing and specific deliverable schedules will be confirmed in a separate engagement agreement prior to commencement.
