

PROPOSAL · CONFIDENTIAL

AI Search Visibility Assessment & Engagement Proposal for Swipe Billing

Prepared for: **Swipe Billing** · Prepared by: **SoftwareSuggest AEO/GEO Team**

EXECUTIVE SUMMARY

Your product is already part of how AI answers buyer questions

Independent tracking of softwaresuggest.com's listing pages shows that **Swipe Billing** (softwaresuggest.com/swipe-billing) has been cited **23 times** across AI Overviews, ChatGPT, Gemini, Perplexity and Copilot to date. This places Swipe Billing among the products already surfacing inside AI-generated answers — the layer an increasing share of B2B buyers now consult before they ever reach a traditional search results page or vendor comparison site.

This proposal outlines the current state of that visibility, the mechanics behind it, and a recommended engagement to protect and expand Swipe Billing's presence as AI search continues to grow as a buyer-research channel.

1. CURRENT AI VISIBILITY ASSESSMENT

Where Swipe Billing stands today

The figures below reflect citation activity captured for softwaresuggest.com/swipe-billing across major AI answer engines.

Source: Ahrefs Brand Radar citation tracking for softwaresuggest.com. Figures reflect point-in-time data collected September 23, 2026 and are subject to change as AI platforms refresh their indexes.

2. REPRESENTATIVE QUERY PATTERNS

The kind of buyer questions this visibility touches

The examples below illustrate common buyer-research query patterns for this category. They are representative constructions, not verified individual prompts, and are included to contextualize how citation activity translates into real buyer touchpoints.

“Swipe Billing vs competitors comparison”

A buyer asking Google AI Overview this today would likely see a structured, cited answer — and with **Swipe Billing** already appearing 23 times across tracked AI platforms, staying visible in exactly this kind of query is what the plan below protects and grows.

“top software like Swipe Billing in 2026”

A buyer asking Gemini this today would likely see a structured, cited answer — and with **Swipe Billing** already appearing 23 times across tracked AI platforms, staying visible in exactly this kind of query is what the plan below protects and grows.

“best Swipe Billing alternative for small business”

A buyer asking Google AI Overview this today would likely see a structured, cited answer — and with **Swipe Billing** already appearing 23 times across tracked AI platforms, staying visible in exactly this kind of query is what the plan below protects and grows.

3. PROPOSED ENGAGEMENT METHODOLOGY

How we protect and grow this visibility

Our approach is structured around four phases, applied specifically to Swipe Billing's category and buyer-intent data:

Three ways to engage — Swipe Billing

Based on Swipe Billing's current citation volume, we'd recommend starting at Dominate — but all three tiers are outlined below so you can choose what fits.

5. TERMS & NEXT STEPS

How to proceed

- This proposal is valid for 30 days from the date above (September 23, 2026 – October 23, 2026). Citation figures and recommended tier may be revised on renewal, reflecting updated tracking data.
- Engagement begins with a scoping call to confirm objectives, category keywords, and reporting cadence.
- Billing and specific deliverable schedules will be confirmed in a separate engagement agreement prior to commencement.
